Printing Guidelines

Design

Strong, bold designs look better on Jute. Fine detail does not appear clear when printed due to the weave of the fabric but finer detail will print better on Juco and Lbs due to the flatter fabric and lighter base color.

Colors

Please ensure that all colors are listed as pantone uncoated references. If you are unable to provide these we will endeavour to match your colors to these references as closely as possible.

Please do not use shading, tints or halftones.

Try and avoid large areas of white or light colors as these are printed with a thicker base to ensure that the natural colors of the bag doesn't show through.

Text

In order to make the text legible on Jute and Juco we recommend a minimum text height of 10mm

Please ensure that any fonts used are clear and bold. Script, thin and some italic typefaces are harder to read when printed due to the weave on a jute bag.

All fonts must be converted to outlines, or if you are using a specialized font, please supply a copy of this when submitting artwork.

Files

Logos and artwork supplied to **Rochdale Biz** need to be of a high resolution to ensure that the print on the bags achieves the best possible results.

Please do not supply artwork taken from websites, these files are designed to be viewed on screen and are small in size so they appear quickly on your computer. They do not have the detail needed for printing.

Please supply all files in one of the following (in order of preference).

High resolution, editable **PDF**

Adobe illustrator **EPS** or **Ai** format

High Resolution **Jpg, Png**
